The day is open to ALL beef producers and industry representatives

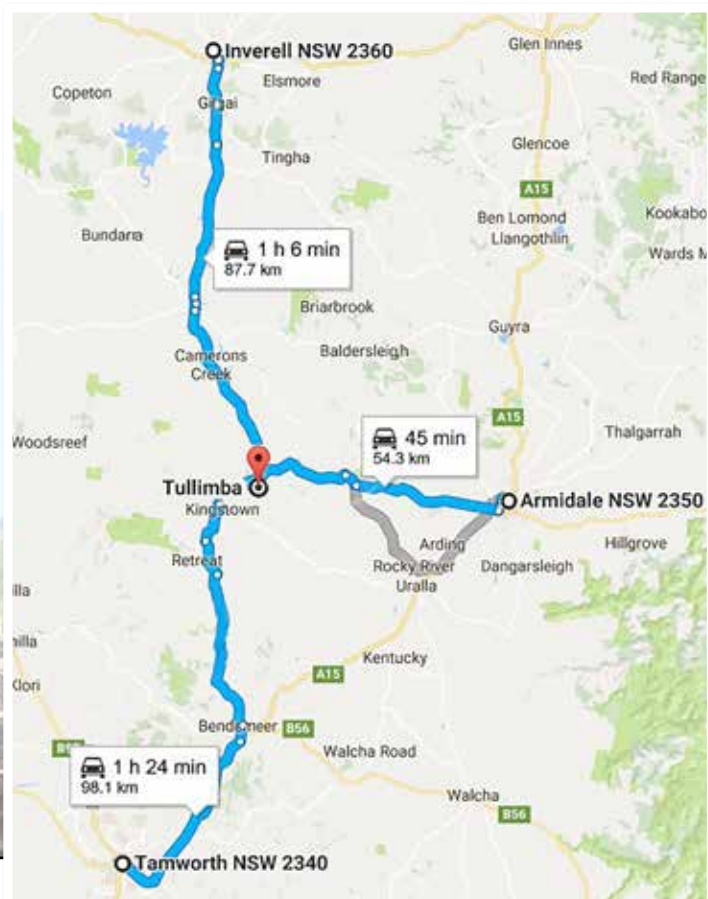

Where:

Tullimba Research Feedlot,
Torryburn Rd Torryburn, NSW.

When:

Wednesday, 23rd November, 2016
from 2:30 - 4:30pm

(light refreshments will be available)

What is the ASBP?

The Angus Sire Benchmarking Program (ASBP) is a major R&D initiative of Angus Australia with support from MLA and industry partners such as Vetoquinol, Rangers Valley Feedlot and John Dee Abattoir. The objectives of the ASBP are:

1. Generate progeny test data on modern Angus bulls, particularly for hard to measure traits such as feed efficiency, abattoir carcase measurement, meat quality attributes & female reproduction.
2. Generate data for the validation & refinement of Angus BREEDPLAN.
3. Build a comprehensive phenotype and genotype database on Australian Angus for genomic technology validation, research and development.

RSVP BY FRIDAY 18TH NOVEMBER 2016
