

BLACK ANGUS CATTLE ASSESSMENT GUIDELINES

Where a raising claim is made in the description of branded beef products, relating to Angus breed content, products must be obtained from Angus animals that are sourced, processed and distributed under conditions which allow the claim to be proven.

The use of a National Vendor Declaration (NVD), Post Sale Summary or Buyer Reconciliation Report providing relevant information identifying the breeding of the cattle is required. The description of cattle section should declare the breed of the sire and the dam of the cattle in the consignment, as follows;

Acceptable supporting document description of cattle on NVD

Angus x Angus

AA x AA

Minimum standards to be accepted under any Black Angus breed claim

Sire: Black Angus

Dam: Black Angus

Straight black and representing Angus phenotype

Small amount of white underline, no more than 10% of the hide
(underline defined as no white visible from the front of the animal)

No white legs and feet

No horns

Scurs are acceptable, however they must not be fixed to the skull

No bos indicus or dairy characteristics such as loose sheath, bos indicus ears or hump
