## If the video is struggling to play

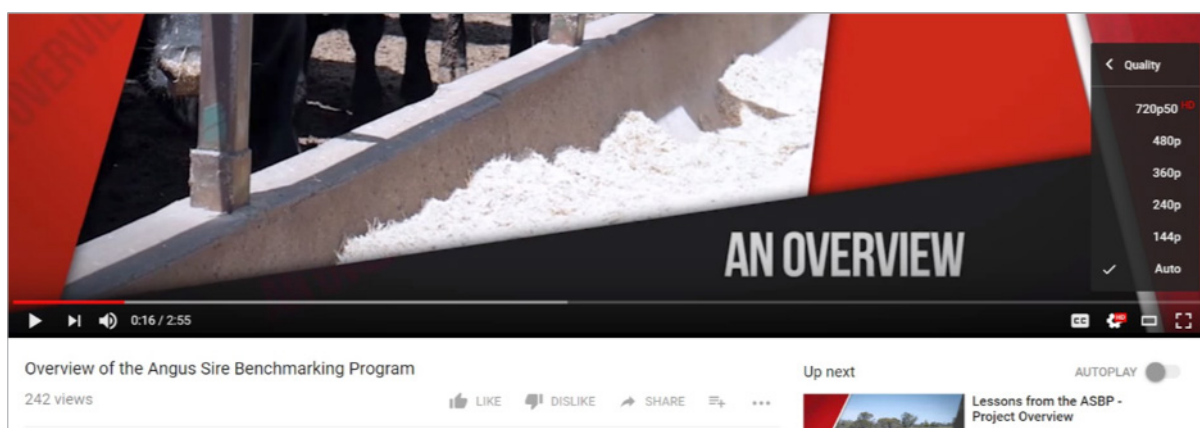

If you are having issues with the video stopping to load or jumping you can reduce the quality to make it easier for your internet and computer to handle.

1. Move your mouse onto the video to bring up the control bar at the bottom of the video screen.

2. Click on the cog icon in the bottom right hand corner of the video to bring up the settings menu.

3. Click the row 'Quality' to bring up the video quality options.
4. Select a video quality below what it is currently playing, indicated by the 'tick'. The smaller the number, the lower the resolution of the video and the easier your internet will find it to play. It is important to note that the lower the resolution the poorer the video quality will be.

## If you missed the livestream event
