

ANGUS BRAND VERIFICATION QUALITY POLICY

Angus Australia is committed to the development and maintenance of the only independent Angus Brand Verification program for all Australian brand owners who wish to label their beef products as Angus or use a raising claim pertaining to the breed as Angus.

Angus Australia is committed to Angus brand owners and Angus Australia's requirements of continual improvement by building on our existing verification program. We will achieve this by setting, reviewing and monitoring our quality objectives, processes and implementation to ensure we meet our customer's needs along with the requirements of the Angus Brand Verification standards.

This will be achieved by planning, control and verification of Angus Australia's services and processes in accordance with the uniform principles of the ISO9001:2015 standard.
