

Angus Australia Catalogue Service Agreement

The following Catalogue Service Agreement will apply to all catalogues produced by Angus Australia or any data extract provided from the Angus Australia database for inclusion in a catalogue.

1. All animals listed in the catalogue shall be "Active and Registered" with Angus Australia (including calves sold at foot).
2. The submitting person must be a Full Financial Member of Angus Australia.
3. All cattle catalogued, with the exception of semen and embryo lots, shall have the following data included as a minimum:
 - a) Lot number;
 - b) Ident (Unique Animal Identifier);
 - c) Name with the first word being the breeder's unique stud prefix;
 - d) Parentage verification suffix displayed at the end of the animal's name i.e. PV, SV, DV, # or E;
 - e) Register in which the animal is recorded (i.e. HBR, APR, RAR, ACR, MBR);
 - f) Date of birth;
 - g) Pedigree, showing a minimum two generations;
 - h) Genetic Condition Status e.g. AMF/NH25%/CAC/DDA
 - i) TransTasman Angus Cattle Evaluation (TACE) performance figures, including:
 - Either the full set of EBVs, or a subset of the EBVs chosen by the member. Where a subset of EBVs is used, a consistent set of EBVs and accuracies shall be used for all lots;
 - Date of the analysis from which the figures were obtained (e.g. January 2020 TransTasman Angus Cattle Evaluation)
 - The current average EBVs for the reference birth year as provided in the Angus Australia website;
 - Traits observed codes;
 - j) The TACE logo must be displayed alongside the EBV tables.
4. All animals listed in a Catalogue shall be in the ownership of the submitting Member. If the Catalogue includes a multi-owned animal, Semen or Embryo listing or is a multi-vendor sale, the submitting member must provide written consent from each of the current listed Owner(s) of those lots in order for them to be included.
5. The accuracy of the information provided for the registration of the animals listed for sale is the responsibility of the breeder. Angus Australia will not be held liable for any animal information that is disputed between vendor and purchaser after the sale.
6. Any additional animal information or content to be included in a Catalogue, must be provided by the submitting member e.g. Raw Structural Data, DOB in months, advertisements etc.
7. Once the Draft Catalogue content is completed by Angus Australia it will be forwarded to the submitting member for checking and approval of its content before the Catalogue will be sent to their printer. Changes made to an already proofed and approved Catalogue will incur additional charges and Angus Australia cannot be held liable for any errors discovered after print.
8. Angus Australia will take no responsibility for information included in Catalogues that have been changed by the member or their printer without the written consent of Angus Australia.
9. Corrections to any errors, pedigree changes etc. following printing and distribution shall be clearly listed in a Supplementary Sheet and provided to potential buyers registered at or before the sale and announced at the sale.
10. For Data Extracts, Standard and Customised Catalogues, data shall be supplied by Angus Australia, via either PDFs or csv file data extracts only.
11. Requests for additional data extracts after the first initial extraction will incur a Data Re-extraction fee e.g. updating lot animal's data for the most current EBVs or DNA results.
12. Any Catalogue PDFs designed outside of Angus Australia must adhere to Angus Australia's Rules and Regulations when displaying any animal's information i.e. Parent verification suffix displayed at the end of each animal's name. Failure to do so will result in the PDF being rejected from the Angus Australia webpage and social media pages.
13. At their consent, of the name and address of the purchaser of any animal sold from the Catalogue will be provided to Angus Australia within 60 days of sale so that the change of animal ownership can be recorded on the Angus Australia database.
14. **IMPORTANT.** The following statement will be included in all catalogues produced under this agreement, including catalogues produced by the member or a third party using a data extract provided by Angus Australia:
 - a) Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.
15. Expected average progeny values calculated using the Angus Mating Predictor can only be included in a catalogue if they relate to an Embryo lot or an unborn calf associated with a female lot stated to be PTIC. In such cases, the following statement will be included in catalogues produced under this agreement, including catalogues produced by the member or a third party using a data extract provided by Angus Australia:
 - a) "Expected average progeny values are provided to assist breeders estimate the outcome of particular mating combinations. The actual TransTasman Angus Cattle Evaluation EBVs for any progeny resulting from a particular mating are likely to vary from the expected average values".
