Breeding Better Bulls to Breed Better Beef

Licensed Semen Collection Service

Collecting semen from your bulls is not only an investment in your own breeding program, it is a very affordable form of insurance. Should something unforeseen ever happen and your bull dies unexpectedly, or gets injured, you will have the peace of mind that you have semen stored from your bull for future use in your breeding program.

Situated at Bacchus Marsh, Victoria, Genetics Australia is an ideal location for consigning your bulls for licensed semen collection. All bulls are housed outdoors in clean, open runs giving your bull ample room to move whilst on centre.

When seeking an organisation to collect, process, ship or store cattle semen, count on the professional, knowledgeable staff at Genetics Australia to provide you with first class service. Genetics Australia can perform the necessary testing required to enable semen to be exported to most countries.

Genetics Australia is accredited to produce semen eligible for export to the European Union and China. Other countries we can qualify semen for are South America, Canada, USA, New Zealand and Russia. Contact Genetics Australia to discuss your requirements for domestic and export semen.
