

Angus ASBPSELECT

The Angus ASBPSELECT tool enables Angus breeders to search and sort for information on Angus bulls enrolled in the Angus Sire Benchmarking Program, to identify potential sires for use within their own breeding enterprises.

This interface makes it easier for breeders to search, sort and compare animals, and to select sires based on a range of information including their progeny performance data, to pinpoint the exact genetics that are of interest to their enterprise.

To access the suite of Angus SELECT tools, head to our website

<https://www.angusaustralia.com.au/angus-tech/angus-select-tools/>

BECOME A REGISTERED USER

Additional functionality is available to users who have signed in as a Registered User. Examples include the ability to access interactive pedigree trees and to customise the display of search results.

ONLINE ACCESS TO ANGUS BULLS ENROLLED IN THE ANGUS SIRE BENCHMARKING PROGRAM

ACCESS TO COMPREHENSIVE INFORMATION ON EACH ANIMAL
