PERFORMANCE RECORDING NOTES

- Frame Score, Muscle Score and Scrotal Size will be published in the Supplementary Catalogue available on the Sales page, www.theglenpastoral.com.au a week prior to the sale and on sale day.
- All calves born are Calving Ease recorded. In most calving cohorts, we do not have to assist any births. Consequently, TACE does not analyse the data in these cohorts and Calving Ease is not included in the list of traits measured, even though it is recorded.
- The Glen's entire breeding herd, including all replacement females and all sale bulls are DNA sampled, Parent Verified and subjected to Genomic Analysis for all traits in TACE.
- The Glen has discontinued scanning for carcass traits at 400 days. In recent years, we have found that the scan data we have submitted did little to influence either the EBV's or the accuracy of the EBV's, after the carcass traits were calculated from Genomic Analysis.
- All calves are weighed at 200 days and sale bulls are weighed at 400 or 600 days.
