

Better heifer management

Advance your herd. Help your heifers.

Join Nancy Crawshaw from Angus Australia for a workshop designed to help you manage your breeding herd to make more profitable heifer selections.

Learn how to:

- set breeding objectives aligned with market and farm goals
- enhance your physical assessment skills when matching bulls and heifers to your herd's needs
- interpret Estimated Breeding Values (EBVs) to select animals that deliver long-term genetic gains
- use Breedplan tools effectively
- match your herd's nutritional requirements in varying seasons.

Turn smart genetic decisions into better business. Places are limited and bookings are essential.
